ABOUT TO ADJOURN.

The Legislature has voted to adjourn sine die at noon to-morrow. It has been a thoroughly time-serving, intriguing, dishonest body, ready for trades and bargains, disgraced by lobby corruptions, ready to secure or defeat bills by false counts, now boss-ridden and now rebellious. It has won the credit

o leaders in this city.

Not a single honest, square measure has been put through on its merits and n the public interest. Some good bills have been passed, and in the end cerain reform measures for this city have een wrung out of the fears of the majority through the power of the caucus. But it has not been an hones: reform Legislature, and its work leaves the Republican party in a more inhar nonious condition than ever.

Mr. Platt has not been fully able to ontrol the action of the majority. His coss-ship this year was by no means as successful as Mr. Croker's last year The Republican fight in this city will be now flercer than ever, and the Refitness to lead a reform movement.

WHAT IT ALL MEANS.

What a transparent humbug is the pretense at Albany of giving us Rapid Transit.

Rapid Transit for the city of New York, rendered absolutely necessary by reason of the peculiar conformation of the city, has no more to do with politics than with the Bible. It is a question of the prosperity of the city and the conenience and comfort of the people. A real rapid transit road ought to be built by practical, experienced men and not by politicians. If the credit of the city loaned to the undertaking, it ought only to be because the money can be raised on bonds at a much lower rate of interest by the city than by contractors, and without any idea that the cost of construction will eventually fall on

When the Legislature provides for a bi-partisan Rapid Transit Commission it has only one object in view, to obstruct and kill any rapid transit road in the interest of the Elevated system, while shirking responsibility. Senator O'Connor talks about the necessity of preventing the project from being controlled by Democrats, he simply does the work of the Manhattan

orporation. A bi-partisan commission would mean a political commission. The men in-trusted with the work from first to last ought to be practical engineers and capable business men. Until this is secured, rapid transit talk is humbug.

If the consolidation would do away with the fun and frolic and turn the island into a highly respectable nd staid outskirt of the City of Churches, New York would rather see Gravesend left out in the cold a little longer.

Radishes.

Radishes possess valuable medicinal properties. They are demulcent, stim-ulating and diuretic and should be eaten freely when fresh and crisp. They are usually eaten with salt only, but if sliced thin are very nice with a French dressing. In this country the radishes themselves are rarely cooked, though the tops of young radishes are often boiled. The radish is a native of Asia, where it has been cultivated from the nost ancient times. Nearly an inch of the green top should be left on the radishes when they are prepared for the table, and this little portion of the top should be eaten, as the peculiar properties they possess help to digest the
